

AMENDMENT NO.0002 TO ADVERTISED IFB W912DR-04-B-0001  
EFFECTIVE DATE: FEB 06, 2004

SOLICITATION:

(1) SECTION 00800, WAGE RATES: Delete General Wage Decision MD030047, as originally issued, and substitute therefor the attached like-numbered General Wage Decision with Modification #1, dated 01/23/2004.

SPECIFICATIONS:

(2) Table of Contents, "ATTACHMENTS", #6: Change "03-WQ-002" to read "04-WQ-001"

(3) ATTACHMENTS: Delete the insert that states "WATER QUALITY CERTIFICATION WILL BE ISSUED BY AMENDMENT" and substitute therefor the attached Maryland Department of the Environment Water Quality Certification 04-WQ-0001.

ATTACHMENTS:

General Wage Decision MD030047 with Modification #1, dated 01/23/2004  
Maryland Department of the Environment Water Quality Certification 04-WQ-0001

General Decision Number: MD030047 01/23/2004

General Decision Number: MD030047 01/23/2004

Superseded General Decision Number: MD020047

State: Maryland

Construction Types: Heavy (Heavy, and Sewer and Water Line)

Counties: Caroline, Dorchester, Kent, Somerset, St Mary's, Talbot, Wicomico and Worcester Counties in Maryland.

HEAVY CONSTRUCTION PROJECTS (Including Sewer and Water Lines)

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations

indicate unions whose rates have been determined to be prevailing.

-----  
WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

## WATER QUALITY CERTIFICATION

NABOP-TN-02-05

CERTIFICATION 04-WQ-001

PUBLIC NOTICE DATE June 14, 2002

TO: Operations Division  
Baltimore District, Corps of Engineers  
P.O. Box 1715  
Baltimore, MD 21203-1715

RE: Maintenance Dredging – Pocomoke River. To remove approximately 69,000 cubic yards of material. The material will be placed at a previously used placement site in 1994 referred to as Site C in the public notice.

This water quality certification is issued under authority of Section 401 of the Federal Water Pollution Control Act and its Amendments and the Environment Article, Sections 9-313 - 9-323, inclusive, Annotated Code of Maryland. A copy of this required certification has been sent to the Corps of Engineers. This certification does not relieve the applicant of responsibility for obtaining any other approvals, licenses or permits in accordance with federal, State, or local requirements and does not authorize commencement of the proposed project. The Maryland Department of the Environment has determined from a review of the plans that the construction of this facility and its subsequent operation as noted herein will not violate Maryland's water quality standards, provided that the following conditions are satisfied.

The applicant shall comply with the conditions marked (X) below:

(X) (1) The proposed project shall be constructed in a manner which will not violate Maryland's Water Quality Standards as set forth in COMAR 26.08.02. The applicant is to notify this department ten (10) days prior to commencing work. Verbal notification is to be followed by written notice within ten (10) days.

(X) (2) The proposed project shall be constructed in accordance with the plan and its revisions as approved by the:

- (X) (a) Corps of Engineers
- ( ) (b) Water Management Administration

(X) (3) All fill and construction materials not used in the project shall be removed and disposed of in a manner which will prevent their entry into waters of this State.

(X) (4) The applicant shall notify this Department upon transferring this ownership or responsibility for compliance with these conditions to another person. The new owner/operator shall request transfer of this water quality certification to his/her name.

(X) (5) The certification holder shall allow the Maryland Department of the Environment or its representative to inspect the project area at reasonable times and to inspect records regarding this project.

Page Two Water Quality Certification

( ) (6) Construction of any bulkhead shall be completed prior to filling behind the bulkhead. The bulkhead shall be constructed in such a manner so as to prevent the loss of fill material to waters of this State. Only clean fill, which is free of organic, metallic, toxic or deleterious materials shall be used.

( ) (7) The disturbance of the bottom of the water and sediment transport into the adjacent State waters shall be minimized. The applicant shall obtain and certify compliance with a grading and sediment control plan which has been approved by the:

- ( ) (a) \_\_\_\_\_ Soil Conservation District or
- ( ) (b) Erosion and Control Representative, Division of Environmental Services, Bureau of Highways, Department of Public Works of the City of Baltimore or
- ( ) (c) The Department of the Environment, Water Management Administration or
- ( ) (d) Montgomery County Department of Environmental Protection.

The approved plan shall be available at the project site during all phases of construction.

( ) (8) The spoil disposal area(s), including dikes where applicable, shall be constructed to limit the suspended solids content in the discharge to the waters of this State to four hundred (400) parts per million or less.

(X) (9) Dredging shall be done only in the period October 1 through May 31.

( ) (10) Stormwater runoff from impervious surfaces shall be controlled to prevent the washing of debris into the waterway. The natural vegetation shall be maintained and restored when disturbed or eroded. Stormwater drainage facilities shall be designed, implemented, operated and maintained in accordance with the requirements of the applicable approving authority.

( ) (11) \_\_\_\_\_ shall provide to the Water Management Administration a stormwater management plan including cross-sections which incorporates effective pollutant removal strategies in uplands to treat a minimum of the first one-half inch of runoff from impervious surfaces prior to release of stormwater into State waters or wetlands. There shall be no discharge of untreated stormwater to State waters or wetlands. The plan shall be provided by \_\_\_\_\_ and shall be implemented by \_\_\_\_\_.

( ) (12) \_\_\_\_\_ shall provide to the Water Management Administration a mitigation plan for the construction of \_\_\_\_\_ wetland for review and approval by \_\_\_\_\_ acre(s) of \_\_\_\_\_. The plan shall be implemented by \_\_\_\_\_.

- The plan shall show:
- the source of hydrology for the constructed wetland
  - the source and amount of soil to be used in constructing the wetland
  - the species, size and density of vegetation to be planted in the constructed wetland and a planting schedule.
  - a monitoring/maintenance plan.

( ) (13) \_\_\_\_\_ shall monitor the mitigation site for a period of five years and shall determine whether the wetland construction has been successful. A successful mitigation project shall result in: \_\_\_\_\_ plants/acre and 85% survivability of plants in forested and scrub/shrub wetlands and plants covering 85% of the area for emergent wetlands. If these standards are not met,

\_\_\_\_\_ shall determine the reason(s) for failure, the problem(s) shall be corrected, and the area(s) shall be replanted and monitored.

Page Three Water Quality Certification

( ) (14) The mitigation site shall be constructed in accordance with the plan, dated \_\_\_\_\_.

( ) (15) \_\_\_\_\_ shall provide a \_\_\_\_\_ plan for review and approval by \_\_\_\_\_ . This plan shall be implemented by \_\_\_\_\_.

( ) (16) At least one culvert in every stream crossing shall be depressed at least one foot below existing stream bottom under the low flow condition. A low flow channel shall be provided through any riprap structures. The culvert shall be constructed and any riprap placed so as not to obstruct the movement of aquatic species.

( ) (17) Stormwater discharges from ponds, stormwater management outfalls, and stormwater facilities shall have a velocity no greater than four feet per second for the two year storm in order to prevent erosion in the receiving waterway or wetland.

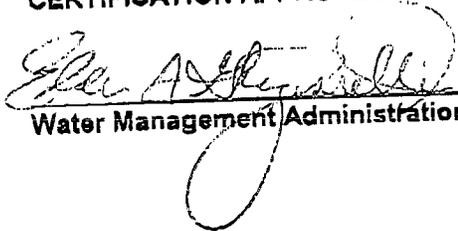

( ) (18) Future stormwater discharges to certified pond(s) are prohibited unless the first one half inch of stormwater runoff from impervious surfaces is managed in uplands for effective pollutant removal.

( ) (19) Authorized stormwater detention ponds shall have a maximum detention time of \_\_\_\_\_ hours.

( ) (20) \_\_\_\_\_ shall restore and revegetate all temporarily disturbed waters and wetlands to original contours upon completion of construction.

Failure to comply with these conditions shall constitute reason for suspension or revocation of the Water Quality Certification and legal proceedings may be instituted against the applicant in accordance with the Annotated Code of Maryland. In granting this certification, the Department reserves the right to inspect the operations and records regarding this project at anytime.
