Direct costs for each line item shall include, as a minimum, all direct and managerial labor, roundtrip mileage within 100 mile radius of Baltimore City, all communication and computer equipment to produce a deliverable work product.

ITEM 0001 - DELAY IMPACT ANALYSIS : Prepared for military and/or civil construction projects administered by the Baltimore District. The contractor shall analyze for cause, relevance, and impact, a real or alleged delay to a construction contract involving a modification, action, or inaction by the construction contractor or the Government, constructive changes, or other situation or combination of situations that may affect the schedule of the construction contractor. Four delay impact analyses are anticipated per year.

The delivery order will identify the Contract Number, Change Identification letters, and the Area Office administering the construction contract for which the delay-impact analysis is required. The delay impact analysis may be required either during the construction contract performance period for use by the Government in negotiating with the construction contractor, or after pertinent aspects of construction are complete for use by the Government in defending its position in a dispute or litigation. The contractor will be responsible for the research and compilation of data pertinent to the delivery order from Government files, which are located at the appropriate Area or Resident Office as indicated on the delivery order. The delay-impact analysis report shall be typed, indexed, and submitted in triplicate.

As a minimum, the completed delay impact analysis report shall consist of:

- a. A narrative summary of the approach taken by the contractor in analyzing the delay, including assumptions made, procedures and methodology utilized by the contractor, and a discussion of the data and information used in preparing the analysis.
- b. A narrative description of the results of the analysis, including and separately identifying factual information discovered, the contractor's professional opinion of the delay, its causes, and its impact on construction, and conclusions.
- c. A graphical comparison of the contractor's as-planned and as-built schedules. The as-planned schedule will be made available to the contractor by the Government as computer-generated sorts of the construction contractor's Network Analysis System (NAS). A typical NAS consists of a minimum of 200 activities. The contractor shall be required to construct the as-built schedule based on availability of daily reports and other information in the Government's files.
- d. A calculation of justified time extension to the construction contract, and a narrative rebuttal of construction contractor claims for time extension that are considered to be without merit.

Delivery of each Delay Impact Analysis is required within thirty calendar days of the date of the delivery order.

ITEM 0002 - CHANGE AND CLAIM ANALYSES : Prepared for military and/or civil construction projects administered by the Baltimore District. The contractor shall analyze, for merit, construction contractor claims through research of daily reports and other contract data, interpretation of contract requirements, and analysis of claimed additional costs or time by the construction contractor. The change and claim analysis may be ordered before or during the construction contract performance period, or after the fact, for litigation purposes. Four Change and Claim Analyses are anticipated per year.

The delivery order will identify the contract number, change identification letters, and the Area Office administering the construction contract for which the change and claim analysis is required. The contractor is responsible for the research and coordination of relevant data available in Government files at the Area or Resident Office indicated on the delivery order. The change and claim analysis shall be typed, indexed, and submitted in triplicate.

As a minimum, the completed change and claim analysis report shall consist of:

- a. Identification of pertinent drawings and specifications and development of a chronology of events and correspondence relative to change or claim.
- b. A narrative summary of the construction contractor's position, and comments on validity of the claim based on the contract documents, chronology of events, and other relevant data.
- c. The contractor's recommendation and supporting rationale as to the position to be assumed by the Government with regard to the claim.

The contractor's change and claim analysis shall address entitlement only. The contractor's report is due within thirty days of a delivery order.

These schedules and analyses will assist the government in monitoring construction projects, as well as, broad district construction programs, such as the Military Base Realignment and Closure Program (BRAC). Services will include analyses of activities and interface points, development of schedules, as well as, monitoring and maintaining and monitoring the schedule.

Develop a PERT analysis for a construction program with a maximum of 600 activities. Provide one original plot and three copies of up to five standard schedule runs. Corps of Engineer guidance will be provided regarding logic, duration, and degree of detail.

Provide a scheduling specialist for performing the above services. The specialist shall possess:

Skill in programming techniques using a combination of software: VAX, VMS, ALLIN1, BASIS, FORTRAN, COBOL, SAS, FAME, SQL FORMS IN VAX VMS environment, MS DOS and associates MS DOS communications, database and spreadsheet software.

Skill in performing information systems need assessments, requirements analysis, design, implementation, and modification.

Skill in planning and managing medium to complex automated information systems projects and coordinating all required project resources including budget, personnel, and acquisitions.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**** NOTES APPLYING TO THIS WAGE DETERMINATION ****

Source of Occupational Title and Descriptions:

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations," Fourth Edition, January 1993, as amended by the Third Supplement, dated March 1997, unless otherwise indicated. This publication may be obtained from the Superintendent of Documents, at 202-783-3238, or by writing to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Copies of specific job descriptions may also be obtained from the appropriate contracting officer.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C) (vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation) and computes a proposed rate).
- 2) After contract award, the contractor prepares a written report listing in order

proposed classification title), a Federal grade equivalency (FGE) for each proposed classification), job description), and rationale for proposed wage rate), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.

3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper. When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
